Notes:

P: Provisional

1. Population figure relates to mid year
2. The net availability of foodgrains is estimated to be gross production (-) seed, feed and wastage, (-) exports (+) imports (+/-) change in stocks.
3. The net availability of foodgrains divided by the population estimates for a particular year indicates per capita availability of foodgrains in terms of Kg / year.
4. Figures in respect of per capita net availability given above are not strictly representative of actual level of consumption in the country especially as they do not take into account any change in stocks in possession of traders, procedures and consumers.
5. For calculation of per capita net availability of net imports from 1981 to 1994 are based on imports and exports on Government of India account only. Net imports from 1995 are, however, based on the total exports and imports (both Government as well as Private accounts).
