(P) : Provisional

- Notes : 1. Population figure relates to mid year.
2. Production figures relate to the agricultural year July-June: 1951 figures correspond to the production of 1950-51 and so on for subsequent years.
3. Net production has been taken as 87.5% of the gross production, 12.5% being provided for seeds, feed requirements and waste.
4. Per capita net availability given above is not strictly representative of the actual level of consumption in the country, because it does not take into account any change in stocks in possession of traders, producers and consumers.
5. For calculation of per capita net availability, the figure of net imports from 1981 to 1994 are based on imports and exports on Government of India account only. Net import from 1995 are, however, based on the total exports and imports (both Government and Private accounts)
