3. MARKET LOANS

In 1992-93, Government of India introduced a Scheme of Sale of Dated Government Securities by Auction, which is conducted by the Reserve Bank of India. This marked a departure from the practice followed earlier in raising market loans by issuing loans at specified interest rates. Apart from Fixed Coupon Securities, Government also issues Zero Coupon Bonds which do not carry any interest but are sold at a discount, Stocks for which payments are made in instalments, Floating Rate Bonds (FRB), on which interest rates are revised annually, Capital Indexed Bonds, etc. From 2001-02, Government have started a Scheme of Retail Sale of Government Stocks.

A total sum of Rs.109500 crore, on gross basis, has been raised through issue of dated securities, including Rs.16000 crore through issue of FRBs, upto January 15, 2004 during the financial year 2003-04.

This does not take into account re-issue of Government securities amounting to Rs.14434 crore (nominal) in lieu of relatively high cost illiquid Government securities bought back under the Debt Buyback Scheme.

For specified durations during 2002-03 and 2003-04, the notified amount have been higher than Rs.500 crore and this accounts for lower outstanding balance at the end of 2003-04.

5. EXTERNAL ASSISTANCE

Budget 2003-04 assumed a gross receipt of Rs.13202.40 crore and Repayment of Rs.9620.78 crore, resulting in net external assistance (excluding external grants) of Rs.3581.62 crore.

The net receipt from external assistance is placed at Rs.(-)11704.65 crore at RE 2003-04 on account of decision to prepay high cost loans from multi-lateral and bilateral sources.

Taking advantage of comfortable foreign exchange reserves and soft domestic interest rates, Government had effected premature repayment of high cost loans amounting to US \$ 2.73 billion from World Bank and Asian Development Bank during February, 2003. In 2003-04, Government has prepaid World Bank loan amounting to Rs.6517 crore during November 2003 and is in the process of prepaying bilateral loans from 9 sources amounting to Rs.5140 crore. The rupee resources to fund these prepayments have been raised through private placement of government securities with RBI.

A summary of estimates of receipts of external assistance and repayment of the principal in 2003-2004 and in 2004-2005 is given below:

6. (A) NATIONAL SMALL SAVINGS FUND

Small Savings Schemes:

The small savings schemes currently in force are: Post Office Savings Account, Post Office Time Deposits-1, 2, 3 & 5 years, Post Office Recurring Deposits, Post Office Monthly Income Account, National Savings Certificate (VIII-Issue), Kisan Vikas Patra and Public Provident Fund.

National Small Savings Fund: (i) All deposits under small savings schemes are credited to the "National Small Savings Fund" (NSSF), established in the Public Account of India with effect from 1.4.1999. All withdrawals by depositors are made out of the accumulations in this Fund. The balance in the Fund is invested in special Government Securities as per norms decided from time to time by the Central Government. Pursuant to the recommendations of the Expert Committee on Administered Interest Rates and other related issues, chaired by Dr.Y.V.Reddy, the then Deputy Governor of the Reserve bank of India, since 1st April, 2002, the entire net collections (deposits minus withdrawals by subscribers) under small savings schemes in each State and Union Territory (with legislature) are advanced to the concerned State/Union Territory Government as investment in its special securities. The debt servicing of Government securities is an income of the Fund while the cost of the interest paid to the subscribers and cost of management of small savings schemes are expenditure of the Fund.

website: <http://indiabudget.nic.in>

(ii) The special Central Government securities issued to NSSF constitute a part of the internal debt of the Government of India.

(iii) Interest at the rate of 9.50 per cent per annum is payable on the special securities issued by State Governments with effect from 1st April, 2003.

Impact of Debt Swap Scheme on NSSF: With effect from 2002-03, a debt swap scheme has been introduced to facilitate State Governments to swap their high cost debt owed to Government of India with additional market borrowings and a part of current small savings transfers. During 2002-03, States swapped high cost loans amounting to Rs. 13,766 crore with 20 per cent of small savings share from September, 2002 to March, 2003 and additional market borrowings. Similarly, during 2003-04 (upto 13th September, 2003), high cost loans amounting to Rs. 32,602 crore have been swapped with 30 per cent of small savings transfers and additional market borrowings. The receipts under debt swap scheme have been used by the Central Government to repay its liabilities to the NSSF. NSSF, in turn, has reinvested the amount received from such redemption in fresh Government of India securities issued at market related rates of interest.

The Fund is financed by appropriation of such portion of the Railway excess, if any, as may be fixed by the Government and voted by Parliament. In RE 2003-2004, an amount of Rs2598.19 crore has been provided for discharging obligatory expenses (redemption of Special securities) under Financial Transaction Plan (FTP) of IMF. A provision of Rs. 2500.04 crore has been kept in BE 2004-2005 towards redemption of Special Securities under FTP.

Special Drawing Rights (SDRs): India is a participant in the Special Drawing Rights allocation of the IMF. Since 1981 the net cumulative allocations of SDR to India remained at SDR 681.2 million, as there was no fresh allocation of SDRs. The SDRs are used in transactions such as payment of charges and discharge of repurchase obligations including payment of additional subscription.

The Fund pays interest to each holder on its holdings of Special Drawing Rights and levies charges at the same rate on each participant's net cumulative allocation. It also levies assessment charges in regard to administration of the SDR account, for all participants on their net cumulative allocations. The net interest or net charges are settled by crediting or by debiting individual holdings account at the beginning of February, May, August and November of each year.

India has already completed repurchases against various facilities drawn by it. Therefore, during 2003-2004, no provision was made under the head. There is no requirement for any provision in BE for 2004-2005.

Purchase and repurchase transactions are debited/credited to the head "Special Drawing Rights" in the Public Account. Payments made to the IMF in the form of SDRs is debited to the relevant expenditure heads per contra-credit to this head. Similarly, receipts realised in the form of SDRs are credited to the relevant receipt heads by contra-debit to this head. The total credits to the head 'Special Drawing Rights' amounted to Rs.1342.12 crore in the Revised Estimate 2003-2004 of which Rs. 1342.12 crore would be contra debited to SDR A/c. The total debits to the head Special Drawing Rights amount to Rs. 1300.47 crore in the Revised Estimates 2003-2004, of which Rs.1300.47 crore would be contra-credited to the SDR Account. During 2004-2005 there will be a credit of Rs. 985.25 crore and a debit of Rs. 977.53 crore.

Budget Estimate 2003-2004 and RE 2003-2004 included a provision of Rs. 53.20 crore and Rs.86.50 crore respectively towards encashment of securities by IBRD. A provision of Rs.86.50 crore has also been kept in BE 2004-2005 in view of the enhanced encashment demanded by the World Bank.

Asian Development Bank (ADB): The Asian Development Bank keeps Rupee securities with the Reserve Bank of India which can be encashed by it to meet its rupee expenditure in India from time to time. As the cash balance with Reserve Bank of India was sufficient to cover the related administrative expenses during the financial year 2003-2004, no provision has been made in BE 2003-2004 and RE 2003-04. A provision of Rs.2 crore has been made in BE 2004-05.
